At the end of each month, we're releasing our findings for the month – including fascinating trends, insight, and how we've been spending and saving money over the past year. This month we focus on the financial year 2017-2018, finding that Australia's population of over 24,000 foreign-born residents (8% of the total population) spent on average $10,607 more than the local born population (inclusive of those living overseas). Australia's population of over 24,000 foreign-born residents (8% of the total population) spent an average of $10,607 more on a range of items than their local born counterparts (inclusive of those living overseas), and a similar trend can be seen for those whose permanent residence is not Australia. Key findings Family travel Despite low levels of overseas travelling, 52% of foreign-born residents born in South-East Asia and the Pacific, and 42% of all overseas-born Australians visited friends and family overseas in 2017-2018, spending an average of

What's New in the AlomWare Actions?

AlomWare Actions is a handy tool that you can use to perform different actions on your computer. It packs a large collection of predefined tasks that you can run using hotkeys or the application interface. You can automate almost any action on your computer and can even automate complex process chains. Some of the tasks you can easily carry out are: + Send text message to your contacts + Print document with specified properties + Open or close settings panel + Temporarily disable antivirus or firewall + Scan for spyware + Encrypt specific fragments of text + Send specified email You can even chain the tasks together, so that when you perform an action, other tasks are automatically executed. For example, by pressing a hotkey, you can print a document while automatically encrypting its fragments. There are many other tasks you can easily perform using this application. It comes with a simple, user-friendly interface that supports the use of multiple devices, such as keyboard, mouse or webcam. However, you might need some medium- to advanced PC skills to understand most of the tasks, the user interface or to use all the applications features. What do you think about AlomWare Actions? Do you have any questions or suggestions for the software? Visit: of the recency effect, motivational state, and simultaneous multi-

tasking on the accumulation and maintenance of knowledge. The recency effect refers to a bias in recall that is evidence for the working memory refreshing and updating of recent experiences (Fagerström, Frydman, & Hagg, 1991, 1996; Hasher, Wager, Leotti, & Boynton, 1986). In this study, we tested whether this bias is causally linked to the recency effect and to the ability to engage in simultaneous processing, and whether recency effects and simultaneous multi-tasking are moderated by the motivational states of having to do things consciously, or spontaneously, and by the need for concentration. Participants recalled sequences that were extracted from a previously studied set of sequences (control condition), from a newly remembered set (refreshed condition), or from a new set that was randomly created and never studied before (new condition). The quality of the memory traces (accuracy) and quantity of memory knowledge (recency effect) were measured during or immediately after learning. Participants in the new
