Pars plana vitrectomy is evolving as a powerful technique for the treatment of complicated retinal detachment. Complicated detachments are associated with severe retinal trauma, proliferative vitreoretinopathy (PVR), giant retinal tears, and/or proliferative vitreoretinopathy. The results of this retrospective review of a population of complicated retinal detachments that were treated by vitrectomy demonstrate that 60 per cent of eyes achieved a flat or stable retina; the visual acuity of these eyes improved to 20/60 or better. Eyes with giant retinal tears and/or PVR had less successful results. Vitrectomy is a safe and effective technique for the repair of complicated retinal detachments. Smash Hit Vaught Cameo 9769V1. For he died a short time ago; The beat of his heart, Is pounding for that devilish woman. Well, of course you know the place, where the hand of the devil still stings. And the last cry of that devilish woman, is ringing the bells Of a graveyard church, where he is buried.
